**Subject:** Microsoft Settlement

I believe that the proposed Microsoft settlement is an incorrect remedy. It does not significantly punish Microsoft and they will have plenty of reason to simply ignore the terms seeing that the opposition will likely let them get away with it. Some terms in the settlement actually make it easier for Microsoft to maintain or expand the monopoly position that they have illegally gained and exploited. This settlement will end up being bad for consumers and competition but good for Microsoft.

Thank You,
